J. Joel Riff
Co-Chair, IP Group

Stephanie O. Sparks
Co-Chair, IP Group

Hoge Fenton Jones & Appel is pleased to sponsor this upcoming program for the Association for Corporate Growth, Silicon Valley Chapter:

What You Need to Know About Doing Business in a World of Hackers, Botnets and Rootkits

Botnets. Base-station cloning. Phishing, Rootkits and man-in-the-middle attacks. Hackers have a variety of weapons they can use to break through the walls of your company. Once in, they can steal confidential data and launch denial-of-service attacks. Cybercrime expert and forensic investigator C.R. Visveswaran (C.R. Vish, as he's known) frequently trains personnel in digital forensics for law enforcement agencies like the CyberCrime branch of the Bangalore Police and CBI. In this presentation, C.R. Vish will help you identify the various risks your organization faces and the methods you can use to ensure confidentiality and availability of data. (If botnets aren't scary enough, C.R. Vish also addresses threats to confidential data that arise from *within* your company....) This is a program you won't want to miss!

The speaker.

C. R. Vish is Associate Vice President and Head of Security Engineering of the Information Security Audits & Architecture Group at Infosys Technologies Ltd. He has more than 15 years' experience in software development for clients in a variety of industries, including power, retail, manufacturing, and financial services. His areas of expertise include e-commerce architecture and supply chain management.

C.R. Vish is a Chartered Accountant, Certified Information Security Auditor, GIAC-Certified Forensic Analyst, and BS7799 Certified Lead Auditor. He is an expert on computer forensics and regulations pertaining to IT, such as SOX and HIPAA. He has spoken in international forums like Interpol on these subjects, and he is a member of the REACT High Technology Crime Investigation Association and the Indo-US Security Forum. C.R. Vish conducts the GIAC-Certified Forensic Analysis mentor courses on behalf of SANS, and is also a part of the Technology Development Council of the Financial Institution Shared Assessments Program (FISAP).

The details.

Thursday, April 10, 2008
6:00 – 8:30 pm

Fremont Hills Country Club
12889 Viscaino Place
Los Altos, CA 94022
