"When Sex is a Crime & Spit is a Dangerous Weapon; How HIV Criminalization Fuels HIV Stigma and Discrimination" Moderated by Jenn Protas

Program Description: The Obama Administration's National HIV/AIDS Strategy, unveiled in July 2010, identifies stigma and discrimination as key drivers of the epidemic and calls for a renewed effort to combat this dynamic. This panel, including a representative from the Department of Justice and leading HIV advocates and litigators, will discuss efforts to fight stigma and discrimination through more rigorous enforcement of the recently-amended Americans with Disabilities Act (ADA) and the reform or repeal of HIV criminalization laws, which [many advocates contend] exaggerate the risks and consequences of HIV transmission and demonize people living with HIV as mere vectors of disease.

Speakers: Scott A. Schoettes, David Knight
