

PRIVACY AND DATA SECURITY

Hoge Fenton is **the one** mid-sized law firm in the South Bay Area that has been in the trenches doing triage on data breaches since 2008. From stolen laptops to phishing scams to hacked servers, Hoge Fenton manages all aspects of incident response, including computer forensics, reputation management, notification, mitigation, and litigation. Hoge Fenton develops privacy and data security plans and provides guidance to help clients minimize the risks of a data breach.

Any company, regardless of its size, that possesses or controls the personal information of individuals, whether they are employees, customers or otherwise, is required by law to protect that information from unauthorized access or disclosure and take affirmative, demonstrative steps from mitigating the risk of losing that sensitive information.
